

We respectfully urge you to reject the NAB's petition 04-160 to limit the programming and services provided by satellite radio. Locally in Fort Collins, there is little programming that we enjoy, i.e. "easy listening" and the big band sound, and we can obtain this from XM satellite radio. In addition, we travel extensively by automobile and find XM a great supplement to local radio throughout the country. All tolled, we find XM of great benefit and well worth it's cost.
